DETAILED ACTION

Claims 14-25 are currently pending in the instant application. Claims 1-13 have been cancelled by preliminary amendment.

I. *Priority*

The instant application is a 371 of PCT/EP03/02510, filed on March 11, 2003 which claims benefit of Provisional Application 60/363,799, filed on March 13, 2002 and claims benefit of Foreign Application EPO 02/14833, filed on December 23, 2002.

II. *Restriction/Election*

A. *Election: Applicant's Response*

Applicants' election with traverse of the Group that is drawn to a compound of formula (I) wherein Q is C; X is N; Y is N; Z is O or NH; t is 0,1,2,3 or 4; L is as defined in claim 1; R¹ is as defined in claim 1 excluding heteroaryl and heterocyclic related groups in R⁷; R² is as defined in claim 1; A is phenyl, naphthyl or indolyl; and R⁵ is hydrogen or phenyl in the reply filed on April 5, 2007 is acknowledged. The traversal is on the ground(s) that: (1) the Examiner did not provide the required support for the lack of unity.

All of the Applicants' arguments have been considered but have not been found persuasive. It is pointed out that the restriction requirement is made under 35 U.S.C. 121. 35 U.S.C. 121 gives the Commissioner (Director) the authority to restrict applications to several claimed inventions when those inventions are found to be independent and distinct. The Examiner has indicated that more than one independent

and distinct invention is claimed in this application and has restricted the claimed subject matter accordingly.

Applicants argue that the Examiner's assertion that the exemplary Groups I-IX are not so linked as to form a single general inventive concept under PCT Rule 13.1 lacks required support. Applicants further argue that the burden is on the Examiner to cite appropriate prior art to clearly show that the defined Groups clearly have distinct status in the art. However, the Examiner wants to point out that the prior art is used to show that Applicants' special technical feature is present in the art. The Examiner

defines the special technical feature as  without any variables.

That is the common link between all of the claims of the instant application. The special technical feature does not define a contribution over the prior art (See, US 5,342,846, for example).

Subject matter not encompassed by elected Group that is drawn to a compound of formula (I) wherein Q is C; X is N; Y is N; Z is O or NH; t is 0,1,2,3 or 4; L is as defined in claim 1; R¹ is as defined in claim 1 excluding heteroaryl and heterocyclic related groups in R⁷; R² is as defined in claim 1; A is phenyl, naphthyl or indolyl; and R⁵ is hydrogen or phenyl are withdrawn from further consideration pursuant to 37 CFR 1.142 (b), as being drawn to nonelected inventions.

III. Rejections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-20 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. Applicant's claim 14 recites "A compound of formula (I), the N-oxide forms." The specification states:

The N-oxide forms of the compounds of formula (I) are meant to comprise those compounds of formula (I) wherein one or several nitrogen atoms are oxidized to the so-called N-oxide, particularly those N-oxides wherein one or more of the piperidine-, piperazine or pyridazinyl-nitrogens are N-oxidized.

The omitted structural cooperative relationship is the "N-oxide forms" of formula (I). It is unclear what or how many nitrogen atoms are N-oxide forms. The rejection will be obviated by deleting the term "N-oxide forms."

Claims 14-20 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Said claim recites "another Zn-chelating group." The specification discloses that:

The term "another Zn-chelating group" refers to a group, which is capable of interacting with a Zn-ion, which can be present at an enzymatic binding site.

The claim is indefinite because it is not clear what R¹ group is deemed Zn-chelating in

relation to "another". The rejection will be obviated by deleting the term "Zn-chelating group".

IV. Objections

Claim Objection-Non Elected Subject Matter

Claims 14-20 and 25 are objected to as containing non-elected subject matter. To overcome this objection, Applicant should submit an amendment deleting the non-elected subject matter.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. It is suggested that Applicant delete the word "novel".

Claim Objection

Claims 19 and 25 are objected to because of the following informalities: not ending with a period. Each claim begins with a capital letter and ends with a period (MPEP 608.01 (m)). In claim 25, the term "an" does not agree with the plural form of "anti-cancer agents" and "compound" is misspelled. Appropriate correction is required.
